

# FarmWeigh Trailer Weighing Kits

Trailer Kit Loadcells come in a variety of sizes, designs and capacities to suit the application

FarmWeigh offer a range of weigh kits for the farmer who wishes to turn his trailer or gruper into a weighing system. Whether you are manufacturing a new unit or installing onto an existing unit FarmWeigh's expertise and knowledge will assist you to design and implement an accurate and reliable weighing system that will improve your bottom line through achieving better quality product and less wastage on the farm.

Typical units that Weigh Kits are ideal for include:

- Feedout Trailers
- Feed Mixing Trailers
- Truck Mounted Feed Systems
- Truck Mounted Fertiliser Spreaders
- Slurry Spreaders
- Trailer Fertiliser Spreaders
- Chaser Bins
- Grupers or Seeders

FarmWeigh's loadcells are extremely heavy duty and designed to take the harshest of treatment your farm can dish out. The electronic scales come in a range of models to suit your particular requirements. Powered by 12volt they will go wherever you and your trailer or truck will go.

FarmWeigh can also custom design the system for you and provide you with drawings to ensure you have the mounting correct and therefore achieve an accurate and reliable weigh system. Alternatively, we can design and have the new system manufactured for you.

Contact FarmWeigh today to arrange a farm visit to discuss your individual needs and provide exactly what you need.
